This document was typeset using the *LaTeX* document processing system originally developed by Leslie Lamport, based on *TeX* typesetting system created by Donald Knuth. It makes use of the *BibTex* software for reference management and formatting and was edited in the *Overleaf* online editor and in *visual studio code*. The main text is written using the *Computer Modern Roman* font.

The technical part was written in *visual studio code*. The implementation is mainly based on *Kubernetes*, *Docker*, *Containerd* and written in the *Go* programming language.

All source code, including this document, can be found under `https://github.com/jb-ba` and the container images are available under `https://cloud.docker.com/u/jbba/repository/list`.
